

Productivity Consultancy

This service is available for the existing Fastems customers who have faced challenges in their production and are willing to develop their processes, methods and systems to meet future demand and develop throughput. Fastems aims to develop customer’s total production performance and flow efficiency, as well as the performance of the automated manufacturing system(s) in order to reach better profitability.

What is included

- Current state analysis
- Development plan
- Implementation
- Follow-up

“I am not sure whether we utilize our production capacity well enough.”

- ✔ **Identify and remove waste and bottlenecks**

“I have more to manufacture and I need to either make a machine investment or improve our current production throughput.”

- ✔ **Make sure you get the best results with your existing production.**

“I need to better visibility to my production to minimize surprises”

- ✔ **Reliable forecast for production output**

Rocking the world of manufacturing

4000 installed systems

1982 first system installed – it’s still running

24/7 worldwide technical support

85 % of support cases solved remotely

Ramp-Up Consultancy

Ramp-up consultancy is a service for customers who have made an investment decision to Fastems automation and want to utilize full potential of the automated production solution from the beginning. This services includes additional support in customer's project management and/or ramp-up phase to set up the overall production processes and practices.

"I want to make sure our productivity is in a best possible level soon after the start-up."

✔ **We help you to maximize the return of your productivity investment.**

"How to align my organization to new working production methods and system(s)?"

✔ **With consultancy we ensure everyone works efficiently.**

"I am not sure what preparations we should make before Fastems system start-up."

✔ **With ramp-up planning everything will be done correctly and in time.**

What is included

- Ramp-up project management
- Planning and implementation
- Trainings
- Support in setting up the initial data
- Maintenance management
- Continuous improvement
