

# Manufacturing made easier.

---

Flexible Manufacturing System FMS ONE

# Unleash your hidden potential at once.

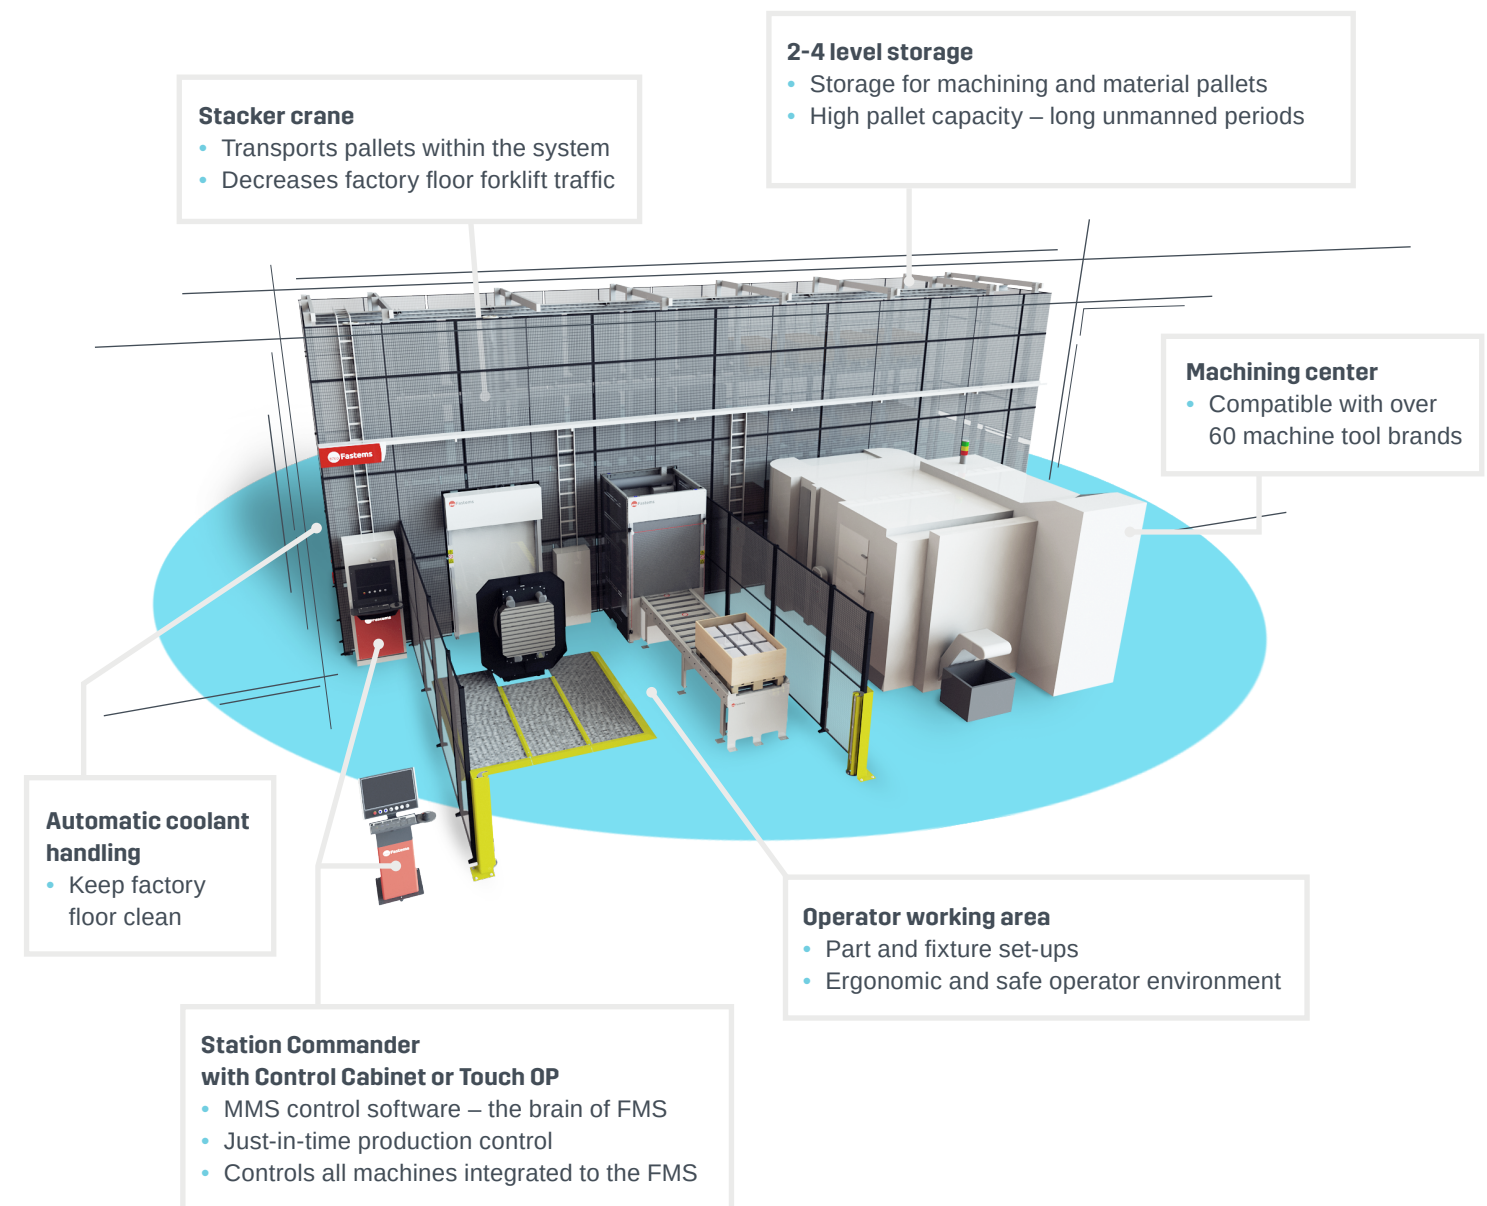

FMS ONE is a modular pallet automation system that integrates different machine tools and material management together.

## 5 x ONE benefits.

- 1 Timely and efficient production**
  - Let the intelligent Manufacturing Management Software (MMS) take care of your production planning, scheduling and forecasting based on the latest data in your ERP and maximizing your resources in production.
- 2 24/7 operation without compromising the resting time**
  - With FMS ONE 24/7 operation is possible without compromising the resting time of your employees. MMS control makes sure that production rate remains high at all times.
- 3 Solution that adapts to your changing production needs**
  - FMS ONE can be extended later to adapt to changes in your production demands.
- 4 Turn your production phases one by one to an integrated process: different machine tools and material management in one system**
  - Make your automated process chains longer by integrating many types of machine tools and/or pallets and your material logistics flow into the same system for maximised spindle utilization and automatic just-in-time deliveries.
- 5 Compact fit on your shopfloor with spacious storage**
  - Up to four levels pallet storage maximizes the floorspace utilization.

## FMS ONE for you.

- Automate 1-10 machine tools
- Up to 2 different machine / pallet types
- Pallet size between 400 mm and 1,250 mm
- Possible to integrate material management

### Do you want more?

If you want to ingrate additional processes or your pallet size is outside the scale, our other FMS solutions work better for you! Please contact your sales representative for further information.

# Loading & material stations.

## LOADING STATION COMPACT LSC / LSF

Manually operated, indexable rotating pallet table.  
Pallet sizes up to 630 x 630 mm.

## LOADING STATION MOVING LSM

Horizontal transfer movement and motorized rotating pallet table.  
Typical pallets sizes starting from 500 x 500 mm.

## LOADING STATION TILTING LST

Horizontal transfer movement, tilting of the pallet, and indexable rotating pallet table.  
Typical pallet sizes starting from 500 x 500 mm.

## MATERIAL STATION CONVEYOR MSC

Two types: for one or two EUR pallets.

# Manufacturing Management Software MMS

## TRANSPARENT PROCESS CONTROL

MMS is the industry's most advanced production planning and execution software. The MMS is always one step ahead by automatically calculating the optimized production workflow and necessary resources based on orders. MMS adapts automatically to changes in the daily production schedule and displays information to maintain the production output.

# Keep your performance in maximum with Lifecycle Services.

- Adaptive for changes
- Automatic production scheduling
- Recognizes bottlenecks in advance
- Automatic resource balancing

# We are Fastems. We are here for you.

---

"At Fastems, we believe that building and maintaining a strong manufacturing base is essential for the development of our society and the well-being of the people."

That is why we do everything in our power to increase the competitive advantage of our customers and to make their production facilities as efficient, profitable and forward-thinking as possible – through intelligent digitization and process automation.

- Decades of industry experience and more than 4,000 successfully installed systems worldwide
- Systems that optimize your time cycles, reduce costs and improve the usability of your existing machinery

- Systems that have been developed with the health and safety of your personnel in mind
- 24/7 support to ensure maximum productivity during all 8,760 hours of the year

We look forward to helping you determine the potential of your manufacturing processes and to finding a solution that is right for you!
