

Your Software for Production Execution

WORK CELL OPERATIONS

We hear your struggles...

“

"I have papers and Excels everywhere - I'm over-reliant on manual processes!"

"Do I have all the materials and needed resources in-place for the next order?"

"What tasks should I do next? Where should these parts go?"

"What is the status of this order? Will it be ready by the due date?"

"What is the utilization rate of my stand-alone machines?"

"Do I have the needed cutting tools and NC-program version in the right machine?"

”

...and we are here to help!

As a flexible Manufacturing Execution System (MES) solution, Work Cell Operations (WCO) is designed to operate standalone machine tools and manual processes, either independently or as part of Fastems automation environment. WCO helps coordinate all your production activities in real time by aligning tasks, machines, and workflows, ensuring every order progresses efficiently from start to finish.

The best part? You can get it for **FREE** during EMO from **22-26 September 2025!**

WCO FREE TRIAL CAMPAIGN

Over 3 months, we'll help you achieve:

- Full visibility & control of your operations
