

Lead and Develop Manufacturing with Data

Factory Cockpit is your guiding tool to manufacturing analytics and transparency. Backed by Fastems' expertise, it helps you navigate your shop floor data, gain insights, and continuously improve production efficiency.

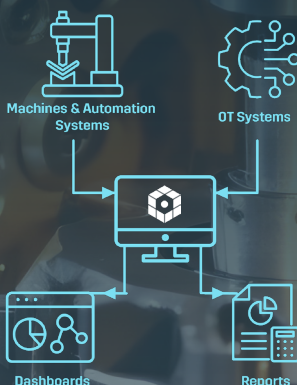

Challenges

"My production data is scattered: I can't see it all in one place."

"I don't know where my focus brings the biggest value in my production."

"I can't find what's causing delays or inefficiencies."

"I don't have clear visibility of my factory's activities in real time."

Solutions

Connect all shopfloor resources and IT systems to one place

Provide real-time KPIs, OEE tracking, and capacity insights from all shop floor equipment

Deliver guided insights that turn data into business value

How Factory Cockpit helps

One central hub

Access dashboards, resources, orders, and reports in one place

Production optimizing

Drill down into analytics to uncover problem root causes

Factory map view

Visualizes and analyzes your shopfloor resources live

Real-time tracking

Track KPIs, OEE, and resource status instantly

AI-powered predictions

Precise lead time predictions for efficient production management

Data-driven reports

Build reports in seconds & share them across users and teams

Powered by Fastems' knowledge, Factory Cockpit guides your production decisions with reliable data and insights.
